

# 1TO1MD™

The Paperless Solution that lets pharmacies and doctors send, receive, sign, approve and store prescriptions online. Plus, instant physician review and approvals, auditable record keeping, unbeatable accuracy and no more faxes.

## Benefits of 1to1 MD

- **Are you dispensing from multiple locations? You need 1to1MD.**

Fill from any of your suppliers, anywhere in the world, as easily as if they were across the street. Find the best price and guarantee your supply when you use a network of suppliers.

- NO special hardware. NO proprietary software. If you have a fax machine, a mouse and an internet browser any pharmacy can link to any doctor anywhere in the world.

- **Paperless means less hassle.** No fax necessary between doctor and pharmacy. **With 1to1MD Paperless Attachment Manager** your prescription records are automatically converted to manageable, easy-to-access electronic files that are safe on our double-redundant servers.

- **Better record-keeping means peace of mind.** 1to1MD provides a full audit trail between physician and pharmacy. A signed e-prescription is always on file.

- **The 1to1MD “no-ink” signature is simply better than paper and fax:**

With **1to1 Scrip Approve™** we’ve almost completely eliminated the risk of forgery, fraud, duplication and mistakes due to illegibility. Doctors “sign” with a basic electronic signature pad or tablet PC.

There is no set-up. Doctors can be signing prescriptions securely online in no time. Doctors’ signatures are captured over the web, encrypted, saved on our servers, and given a “time stamp” that includes the computer address of the signer.

To learn more about 1to1MD please call 1 877 621 4266, email [sales@crm3.com](mailto:sales@crm3.com) or visit [www.1to1md.com](http://www.1to1md.com)

# 1TO1MD™

## Scrip Approve™

Only 1to1 offers this cutting edge service! Scrip Approve™ is software that integrates with any easily attached mouse signature pad or tablet PC. This solution captures handwritten signatures electronically; that lets you eliminate dependency on paper, combat fraud, and enable automation through the rest of the 1to1 MD functions. That means lower costs, easy-to-access records and peace of mind. The future of prescription management is here today.

# 1to1MD Features

## Paperless Attachment Manager

*With the Paperless Attachment Manager we bring you one step closer to the “paperless office.”*

- Scan prescriptions, pictures and other vital documents using your current scanning technology then “drag and drop” into a special secure folder on the 1to1 database
- Documents are accessible from anywhere in their “original” form
- Documents can be associated with patients or doctors

## Patient Profile Manager

With 1to1 Patient Profile Manager vital patient information (medical history, allergies, recent check ups) is always easily at hand for doctors and pharmacists – yet permission-granting administrator tools mean information is viewed on a need-to-know basis. Patient information is kept secure and confidential. Information is easy to update – and new information is automatically added to the master file.

## Here’s how 1to1MD works for pharmacies

- 1 Your pharmacy receives a prescription from a patient or their doctor by fax or mail.
- 2 With the click of a mouse, the prescription goes directly into the secure 1to1MD server
- 3 You can now assign the prescription to any associated doctor for approval anywhere in the world. The patient’s medical information is attached to the e-file so vital medical information is easily available to the doctor at any time in the filling process.
- 4 Using 1to1MD digital signature, a doctor can fill out a prescription online. A second doctor can review and sign the prescription online. That means no waiting – your clients get their prescriptions sooner.
- 5 Your pharmacy views and downloads the approved prescriptions.
- 6 All parties retain signed, time-stamped prescriptions.
- 7 With an auditable trail that all parties can check, billing is a breeze.
