

1T01 PHARMACY™

The Future of Pharmacy

Streamline administration, enable multiple supplier dispensing, speed up prescription approvals, provide iron-clad tracking and security of data, and easy third party marketing

Benefits of 1t01 Pharmacy

■ Easy E-commerce

1t01 provides an easy-to-use shopping cart that makes buying effortless for clients - and keeps you in control.

■ Your customers will love you for letting them track their order – and you'll save money

Your customers can log into the 1t01 system and see the status of their order from your website - greatly reducing expensive call center volume.

■ The supply chain: it's the issue for many Pharmacies. We make the solution easy

With our technology and marketplace experience, it's easy to fill from anywhere in the world.

■ Faster and easier prescription approvals

1t01 receives prescriptions in electronic format then "attaches" them to customer files. When you use 1t01MD, doctors login and approve prescriptions over the web. Approval is instant - with a complete audit trail.

■ Increase productivity & cut costs

Your contact and health information on one screen. Track all your patient correspondence. Slash data entry time when you import price spreadsheets directly into your system. Instantly manage your margin.

■ Your data is safer than ever before

Our 1t01 servers are double redundant and feature up to seven layers of encryption.

Search, Add and Group data

1to1 Pharmacy allows you to easily add and organize information

Group and sort entries according to whatever criteria you choose (e.g. first name, last name, patient status, last purchase, waiting for prescription...).

The industry's best e-commerce solution

Advanced merchant services tools get you in business, fast

1to1 brings you an easy-to-use shopping cart and industry-leading merchant services tools like **Eigendev Easybatch** and **Verisign Pay-Flow-Pro**

1to1 Pharmacy Features

Receive, assign, collate, store, deliver and report on prescriptions.

Link Files

The truly paperless office is coming - thanks to features like "Link Files"

This is the link between your electronic patient files and their vital documents such as prescriptions. Scanned documents (from multiple sources) are easily matched with your stored patient files. Vital medical information is always available to doctors and pharmacists at the click of a mouse.

Price Manager

Keep ahead of the competition with instant price changes

- Adjust prices by percentage and/or flat rate.
- Easily set prices for individual products or classes of products.
- Set different prices for your various vendors, affiliates, groups.
- Manage your margins for maximum profits.

Supply Chain Management

Problems accessing certain meds? The solution is a mouse-click away.

Dispensing from multiple supplier pharmacies is as easy as choosing from a drop down menu. This tool allows you to assign different parts of the same order to different pharmacies.

Shipping

1to1 Pharmacy integrates with Canada Post VCD, Fed Ex, UPS or any courier software. Create your shipping labels, estimate postage, and record tracking numbers for each order. Know in an instant which orders have been shipped and where they are in the system. Your customers can log in too, saving customer service time and expenses.

Import Product Lists

Save countless hours of product data entry

When you receive a product price spreadsheet from a supplier, you no longer have to key in the individual price adjustments - now simply import the spreadsheet into your system.
